

Family Partner Rodneisha Chatman

Our 2022 Women Build Homebuyer, Rodneisha, is a single mom of two young kids - Raniyah (age 7) and Ra'Sean (age 5). She currently works at Ochsner as a Medical Assistant.

To her, home is a place where her family can feel comfortable and safe, which isn't something that is possible in their current apartment. Rodneisha has been surprised at how quickly the program seems to be going for her. She joined the Habitat program in December of 2021 and worked so hard that she was able to meet half of her required Sweat Equity hours within six months!

Construction is set to begin on her house in October, less than a year after starting the program, and she is so excited! She is eager and excited to be able to create a space that is truly hers with this new house, and she can't wait for her kids to have their individual spaces to grow up in.

Thanks to the affordable mortgage payments, she will finally be able to save for a new and reliable car, which has been a long-term goal for her. A lot is about to change in her life, but her family motto is one thing that is going to stay the same, "We stick together and it's always US."
